Krish Rupapara (202101198)

Functional Dependencies (FDs) :

1) App

Minimal FD :

$\text{app_id} \rightarrow \{ \text{app_name}, \text{description}, \text{app_size}, \text{price}, \text{rating},$
 $\text{release_date}, \text{is_active}, \text{age_restrictions},$
 $\text{app_version}, \text{downloads}, \text{add_contains},$
 $\text{in_app_purchases}, \text{min_android_ver}, \text{dev_id} \}$

Key : app_id

Type : BCNF

Reason : All attributes of App relation is directly dependent on the key { app_id }.

2) Permissions

Minimal FD :

$\{ \text{app_id}, \text{permissions} \} \rightarrow \emptyset$

Key : { app_id, permissions }

Type : BCNF

Reason : All attributes of Permission relation are primary key.

3) App_Category

Minimal FD :

$$\{ \text{app_id}, \text{app_category} \} \rightarrow \emptyset$$

Key : { app_id, app_category }

Type : BCNF

Reason : All attributes of App_category relation are primary key.

4) Purchased_apps

Minimal FD :

$$\{ \text{app_id}, \text{user_id} \} \rightarrow \{ \text{installed_date}, \text{given_rating}, \text{update_available}, \text{app_version} \}$$

Key : { app_id, user_id }

Type : BCNF

Reason : All attributes of Purchased_apps relation is directly dependent on the key { app_id, user_id }.

5) Developer

Minimal FD :

$$\text{dev_id} \rightarrow \{ \text{dev_name}, \text{dev_email}, \text{dev_website}, \text{dev_country}, \text{dev_joindate}, \text{dev_revenue} \}$$

Key : dev_id

Type : BCNF

Reason : All attributes of Developer relation is directly dependent on the key { dev_id }.

6) App Wishlist

Minimal FD :

$\{ \text{app_id}, \text{user_id} \} \rightarrow \emptyset$

Key : {app_id, user_id}

Type : BCNF

Reason : All attributes of App_wishlist relation are primary key {app_id, user_id}.

7) Movie

Minimal FD :

$\text{movie_id} \rightarrow \{ \text{movie_name}, \text{IMDB}, \text{movie_length}, \text{description}, \text{downloads}, \text{is_Active}, \text{release_Date}, \text{price}, \text{age_restriction}, \text{max_Quality}, \text{studio_id} \}$

Key : movie_id

Type : BCNF

Reason : All attributes of Movie is directly dependent on the key
 $\{ \text{movie_id} \}$.

8) Movie_Category

Minimal FD :

$\{ \text{movie_id}, \text{movie_category} \} \rightarrow \emptyset$

Key : $\{ \text{movie_id}, \text{movie_category} \}$

Type : BCNF

Reason : All attributes of Movie_category relation are primary key.

9) Directors

Minimal FD :

$\{ \text{movie_id}, \text{directors} \} \rightarrow \emptyset$

Key : $\{ \text{movie_id}, \text{directors} \}$

Type : BCNF

Reason : All attributes of directors relation are primary key.

10) Writers

Minimal FD :

$\{ \text{movie_id}, \text{writers} \} \rightarrow \emptyset$

Key : {movie_id, writers}

Type : BCNF

Reason : All attributes of writers relation are primary key.

11) Languages

Minimal FD :

$\{ \text{movie_id, languages} \} \rightarrow \emptyset$

Key : { movie_id, languages }

Type : BCNF

Reason : All attributes of Languages relation are primary key.

12) Cast

Minimal FD :

$\{ \text{movie_id, cast} \} \rightarrow \emptyset$

Key : { movie_id, cast }

Type : BCNF

Reason : All attributes of cast relation are primary key.

13) Purchased Movies

Minimal FD :

$\{ \text{user_id}, \text{movie_id} \} \rightarrow \{ \text{purchased_date}, \text{given_rating} \}$

Key : { movie_id, user_id }

Type : BCNF

Reason : All attributes of Purchased_Movies relation is directly dependent on the key { movie_id, user_id }.

14) Studio

Minimal FD :

$\text{studio_id} \rightarrow \{ \text{Revenue}, \text{Studio_join_date}, \text{Studio_Country}, \text{studio_Name}, \text{Studio_Email} \}$

Key : studio_id

Type : BCNF

Reason : All attributes of Studiorelation is directly dependent on the key { studio_id}.

15) Movie_Wishlist

Minimal FD :

$\{ \text{movie_id}, \text{user_id} \} \rightarrow \emptyset$

Key : { movie_id, user_id }

Type : BCNF

Reason : All attributes of Movie_wishlist relation are primary key.

16) Book

Minimal FD :

$$\text{book_id} \rightarrow \{\text{book_name}, \text{book_size}, \text{pages}, \text{downloads}, \text{rating}, \text{price}, \text{is_audiobook}, \text{publised_date}, \text{description}, \text{age_restriction}, \text{publisher_id}\}$$

Key : book_id

Type : BCNF

Reason : All attributes of Book relation is directly dependent on the key { book_id }.

17) Written_By

Minimal FD :

$$\{\text{book_id}, \text{author_id}\} \rightarrow \emptyset$$

Key : {book_id, author_id}

Type : BCNF

Reason : All attributes of Written_by relation are primary key.

18) Book_Category

Minimal FD :

$$\{\text{book_id}, \text{book_category}\} \rightarrow \emptyset$$

Key : {book_id, book_category}

Type : BCNF

Reason : All attributes of Book_category relation are primary key.

19) Book Languages

Minimal FD :

$$\{\text{book_id}, \text{language}\} \rightarrow \emptyset$$

Key : {book_id, language}

Type : BCNF

Reason : All attributes of Book_languages relation are primary key.

20) Publisher

Minimal FD :

$$\text{publisher_id} \rightarrow \{\text{publisher_name}, \text{publisher_email}, \text{publisher_country}, \text{publisher_revenue}\}$$

Key : publisher_id

Type : BCNF

Reason : All attributes of Publisher relation are directly dependent on

the key { publisher_id }.

21) Author

Minimal FD :

$$\text{author_id} \rightarrow \{\text{author_name}, \text{author_email}, \text{author_country}, \text{author_join_date}\}$$

Key :

author_id

Type : BCNF

Reason : All attributes of Authorrelation is directly dependent on the key { author_id }.

22) Purchased_books

Minimal FD :

$$\{\text{book_id}, \text{user_id}\} \rightarrow \{\text{installed_date}, \text{given_rating}\}$$

Key : { book_id, user_id }

Type : BCNF

Reason : All attributes of relation is directly dependent on the key { book_id, user_id }.

23) Book_Wishlist

Minimal FD :

$\{\text{book_id}, \text{user_id}\} \rightarrow \emptyset$

Key : { book_id, user_id }

Type : BCNF

Reason : All attributes of Book_wishlist relation are primary key.

24) User

Minimal FD :

$\text{user_id} \rightarrow \{ \text{user_name}, \text{password}, \text{email}, \text{date_of_birth}, \text{status}, \text{date_created}, \text{wallet_coin} \}$

Key : user_id

Type : BCNF

Reason : All attributes of User relation is directly dependent on the key { user_id }.

25) Transaction details

Minimal FD :

$\text{transaction_id} \rightarrow \{ \text{source}, \text{recipient}, \text{amount}, \text{ransaction_date}, \text{payment_method} \}$

Key : transaction_id

Type : BCNF

Reason : All attributes of Transaction_details relation is directly dependent on the key { transation_id }.
